

Team/Instructor scrum #3.1

Team member & project (re)introductions

Name of the team: Master Calculator.

Team member: Philip Anyuon.

The role and responsibility of building the master calculator is still the same. The development technology stack changes slightly by adding the product to work across a platform. The development lagged back a little bit due to midterm exams and there was some issue with slow of the development software. In this coming week, the problem will be resolved, and the development will start and continuous.

Scrum dates

Oct.15, 2021 - Oct.22, 2021

Status description

The status of the project is yellow.

- This week was a busy week with midterm exams.
- Another issue was the problem that cause the software to be very slow.

All those problems will be resolve quickly in this coming week.

Comments from previous Scrum

Regarding my Mentor, I didn't meet him yet. His time seem to be a busy one.

Project issues

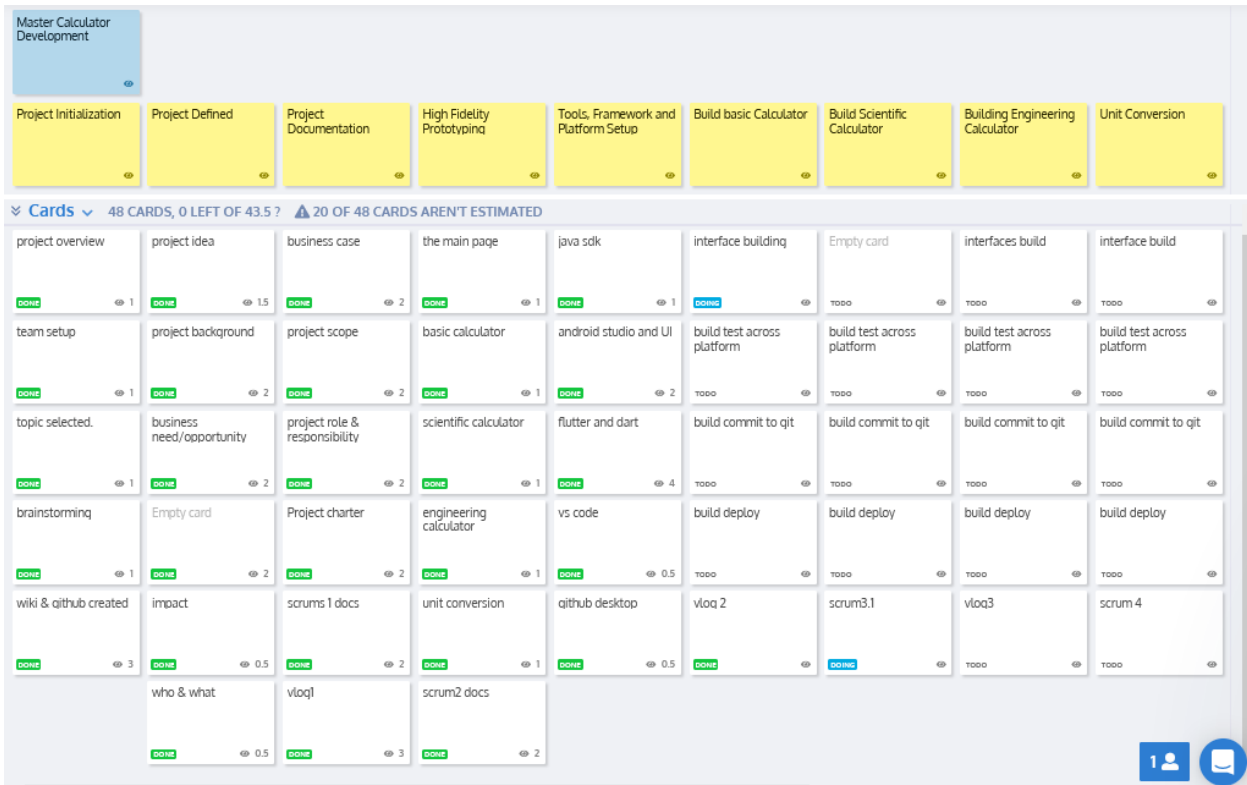

There is no issue apart from the previous mentioned issues.

Project changes

There is no change after the vlog of Oct 15, 2021.

Documentation overview and/or project demo

The very important document I added to the previous documents is StoriesOnBoard. It is shown blow. It must be updated every time when each task has been completed. So, it will be presented every time of each scrum to provide a clear stopping point.

Next up

The plan for the next two weeks is:

1. To make sure the development software work efficiently.
2. Bringing the remaining technical documents include architecture diagram.
3. Finishing at least 75% of the coding work.

Team reflection

Discuss:

- Does the team feel "on track"? **The team slow down a bit.**
- What progress does the team particularly feel good (great) about? **The scope of the work is very clear on StorieOnBoard and the team should be focusing on each task each time.**
- What barriers (if any) does the team feel are a current impediment to success? **There is no huge barrier at this time.**
- What help (if any) does the team require to move positively forward? **A comment is enough.**
- What questions or concerns does the team have (if any)? **No question.**
